

# ALL South Cambridgeshire Network

Association *for*  
Language Learning

Friday 21 December 9.30 – 3.30

Whole day CPD event run by **Joe Dale**

Title: Keeping your learners 'appy! - Using iOS and Android devices for enhancing language learning.

Description:

In this session, Joe Dale will explore a range of practical ideas on how iOS and Android apps can enhance language learning by personalising learning, facilitating collaboration and fostering creativity.

He will demonstrate how to create and consume multimedia content with the apps Hokusai, iTalk Recorder, Voice Recorder for Android, Eyejot and Aurasma and show how they can combine effectively with file management tools Wappwolf, Dropbox, Box and QR codes.

There will then be the opportunity for hands-on practice with your choice of tools before a scaffolded session for you to plan an integrated sequence of lessons ready for use the next day.

Finally, we will look at the formative assessment tools Linoit, TodaysMeet and Socrative to pool ideas on the usefulness of the apps presented for language learning purposes.
