| Now | Post-reform |
|---|---|
| 5 A*-C grades in English, mathematics and any other three subjects at GCSE | % of pupils receiving a 'pass' in English and mathematics Average point score progress measure - pupils' average scores across a suite of 8 qualifications consisting of: English and mathematics S further English Baccalaureate (EBacc) subjects S other high value qualifications – EBacc, other academic, arts or vocational. |
| Reported in performance tables, and used for floor standards | Reported in performance tables, and used for floor standards |
| English Baccalaureate (EBacc) – A*-C grades in each of: English, mathematics, 2 x science subjects, history/geography, a foreign language | EBacc remains the same – pass in each of: English, mathematics, 2 x science subjects, history/geography, a foreign language |
| Reported in performance tables | Reported in performance tables |
| GCSE | GCSE (reformed, but the name remains the same) [A proposed name change to English Baccalaureate Certificates (EBCs) is not being implemented] |

Q & A

What is happening to the EBacc?

• It remains unchanged as a measure published in performance tables consisting of five subject areas (English, mathematics, sciences, history/geography and languages).

But might computer science displace languages in the EBacc?

• Absolutely not. Computer science is not a sixth subject area; it counts as one of the sciences.

What is a floor standard?

 The floor standards for primary and secondary schools represent the minimum level of acceptable performance for a school. The floor standard is based on certain performance indicators, at present the 5 A*-C including English and maths measure. The secondary floor standard was raised to 40% of pupils achieving 5 GCSEs at A*-C, including English and maths from the summer 2012 examinations. All schools use the floor standard indicators to judge their performance.

So what does the 8 subject measure mean for languages?

• The eight subject measure will exist alongside the EBacc, as the current floor standard does. It does <u>not</u> replace the EBacc. It potentially provides more opportunities for pupils to study two (or more) languages, as they could take a language in each of the second and third categories of eligible qualifications.
